

DMC Health Access Center

Once you have completed the Detroit Medical Center (DMC) credentialing process, you may enroll in the DMC Health Access Center's Physician Referral Service Program. The center's advisors are trained to connect patients seeking a primary care physician or specialist to your office. There is NO charge for our service to you or your patients!

Our representatives use their extensive experience to assist patients in getting an appointment. Once appointments are confirmed, your new patient receives a thank you note and a confirmation letter indicating the appointment date and time, your name, and their basic information.

In addition, your profile will be automatically added to the DMC Physician Referral web site. More and more patients are looking to the web to find a physician that best matches their needs, in terms of practice location, language, and insurance compatibility. This web tool lets them find the right doctor, in the right place, and even request an appointment. Your profile should include a photo (profiles with photos receive far more requests than those without.) To include your photo, simply email it in (.jpg) format to docprofile@dmc.org.

Once enrollment is completed, your data will be verified and added to our database. Your practice will then receive:

- Referrals and Appointments
- Complimentary semi-annual referral/appointment reports
- A dedicated Health Access Center representative, who will periodically assist in information updates

Complete the information below and we will forward the required forms to you.

I am interested in receiving FREE referrals/appointments through the DMC Health Access Center

Print Name: _____ Date: _____

Office Contact Phone Number: _____

Primary Practicing Specialty: _____

I prefer to receive the forms via: FAX – please send to fax number: _____

EMAIL – please email to: _____

Please fax/email this information sheet to the DMC Health Access Center, at:
